Connecting people and businesses everywhere

Sustainability-driven innovation to lead the energy transition and digital transformation

With a legacy spanning over 150 years, Prysmian is a global leader in energy and telecom cable solutions, driving innovation and sustainability. In 2023, we achieved over €15 billion in sales, supported by our 33,000 employees, 82 manufacturing plants, and operations in more than 50 countries worldwide.

We offer the broadest range of cutting-edge products, services, and technologies tailored to meet the evolving needs of our customers. From enabling the energy transition with our pioneering E-Path sustainable cable solution, to supporting critical telecom infrastructure, Prysmian plays a pivotal role in building resilient and efficient systems across the globe.

Our commitment to work closely with our customers ensures that we deliver solutions to help them expand energy and telecom networks, achieving sustainable, profitable growth while addressing the challenges of a rapidly changing world. Together, we're shaping the future of connectivity and electrification.

The planet's pathway

Our world-leading cable solutions

Transmission

- Submarine power and telecom systems
- Marine installation through inhouse fleet
- Underground interconnectors up to 525kV DC
- Complete solutions provider:
 - Turn-key execution approach
 - Continuous monitoring
 - Post-installation maintenance

Power Grid

- HV/EHV AC systems supply and installation
- MV and HV/EHV Network Components (NWC) up to 500kV
- Power Distribution cables' solutions from LV to MV (and up to 69kV)
- Data-driven permanent monitoring systems for power networks

Electrification

- Renewables
- Specialties & OEM
 - (Railway, Marine, Crane, Mining, Nuclear, Rolling Stock, Defence, Electro medical, other infrastructure)
- Data Centres
- Energy Storage Systems
- OGP Onshore/Offshore & SURF
- Elevators
- Other Industrial
- Residential, Hospitals & Commercial constructions

Digital Solutions

- Commercial Buildings
 - Passive Optical Cabling
 - Structured Cabling System
 - Building Management
- Data Centre
- Mission Critical and Harsh Environment
- Broadcast and Studio
- Marine & Shipboard

Network components

Empowering Reliable Grids with Comprehensive Network Components

We go beyond cables to deliver complete solutions for your transmission and distribution needs. Our extensive portfolio of network components and accessories—including joints, terminations, connectors, and glands—ensures seamless integration with power systems, whether for new installations or upgrades to existing grids. Engineered to the highest standards, our components provide reliability, safety, and performance, supporting utilities in building efficient and robust power networks.

We offer tailored solutions across all voltage classes, including innovative designs for optical fiber integration and asset monitoring systems, reflecting our commitment to sustainability and innovation. Our advanced technologies, such as pre-expanded and cold-shrink options, enable faster, easier installations, reducing downtime and ensuring operational excellence.

Backed by Prysmian's global reach and local expertise, we provide dedicated engineering support and customized designs to meet specific project needs. Together, let's build the future of power systems with network components that are as reliable and innovative as our cables.

Asset monitoring & systems

Advanced Sensing Solutions for Proactive Asset Management

Prysmian's Electronic and Optical Sensing Solutions (EOSS) are at the forefront of system integrity monitoring, offering cutting-edge tools to safeguard your critical assets. Our comprehensive platform integrates partial discharge (PD) detection, distributed temperature sensing (DTS), and distributed acoustic sensing (DAS) to provide real-time insights into your system's health. With Pry-Cam solutions for both portable, spot analysis and permanent installation for continuous monitoring, you hold the power to act proactively, ensuring safety, reliability, and costefficiency.

Our systems deliver precise data on temperature variations, partial discharge activity, and acoustic anomalies, enabling informed decision-making to prevent costly repairs or unplanned downtime. Scalable and flexible, the modular design adapts to your evolving needs, while user-friendly interfaces streamline monitoring and analysis.

With EOSS, Prysmian elevates monitoring from reactive to preventive, helping utilities and industries achieve enhanced operational reliability. Discover how EOSS and Pry-Cam can transform your approach to asset management, ensuring the safety and longevity

Prysmian in the region

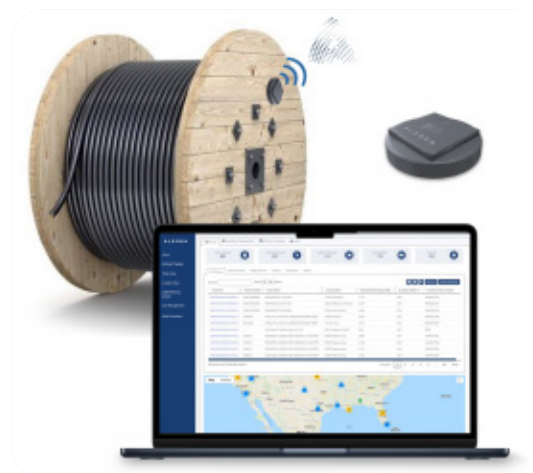

Smart Cable Management with Alesea

Alesea is Prysmian's virtual assistant for cable management, designed to give users real-time visibility and control over their cable drums through an intelligent IoT platform. It monitors location, usage, and inventory, helping teams stay on top of operations while reducing costs and improving project efficiency.

By turning data into actionable insights, Alesea enables better decision-making across the entire cable lifecycle. Users benefit from optimized logistics, proactive maintenance, and improved asset utilization. It also supports sustainability by reducing cable waste, minimizing unnecessary travel, and promoting drum circularity—directly contributing to lower CO₂ emissions and resource conservation.

Proven across utilities and infrastructure projects in various countries, Alesea is scalable and adaptable, with potential to integrate additional connected assets and

future technologies. It enhances collaboration across teams, streamlines workflows, and reduces the risk of human error.

More than just a tracking device, Alesea transforms traditional cable management into a smart, automated, and sustainable ecosystem fit for the digital age.

Prysmian operates extensively across the Asia Pacific region, supported by a robust infrastructure that includes 13 manufacturing plants across China, Malaysia, Indonesia, the Philippines, and Thailand. Our regional distribution center in Singapore serves as a strategic hub, ensuring seamless delivery of cutting-edge cable solutions for the energy, infrastructure, and telecom markets.

In Asia Pacific, Prysmian is proud to be a part of landmark projects that showcase our expertise and commitment to innovation. These include addressing the complex cable requirements of iconic developments like Marina Bay Sands in Singapore and supporting the ambitious South Vietnam submarine cable projects,

which strengthen regional connectivity. Additionally, Prysmian's advanced solutions have contributed to offshore wind farm developments, highlighting our pivotal role in accelerating the region's transition to renewable energy.

With a clear focus on sustainability and a strong local presence, Prysmian is well-positioned to meet the demands of Asia Pacific's rapidly growing markets. We remain dedicated to delivering innovative technologies that empower our partners and drive the region's progress towards a more connected and sustainable future.

Our corporate brand

Prysmian has a multi-brand architecture made of three levels: a strong Corporate Brand, Prysmian, which stands for the whole organization. It is the umbrella brand under which all the initiatives regarding the Company worldwide are carried out.

The second level is represented by the three well-known Commercial Brands: Prysmian, Draka and General Cable.

The third level encompasses the wide range of product brands that serve all the markets and applications in which the Company operates.

Building management systems

A Building Management System (BMS) is a centralized control system used to monitor and manage various mechanical, electrical, and plumbing systems in buildings. It improves efficiency, enhances comfort, and ensures safety. Key functions of BMS including

- HVAC Control (Heating, Ventilation and Air Conditioning)
- Security & Access Control
- Lighting Control
- Fire & Safety Systems
- Parking Management Systems

How prysmian benefits your business

Technical Consulting

Confidently build the network you require with Prysmian technological expertise in Building Management System cabling solutions.

Improved Efficiency

Seamless integration of communication networks optimizes system performance.

Enhanced Security

Reliable signal transmission ensures uninterrupted surveillance and access control.

Cost Reduction

Energy-efficient solutions minimize operating expenses.

Scalability & Flexibility

Future-proof designs allow easy adaptation to new technologies and business expansions.

Access control system and cables

A conventional Access Control System can range from the environment, the type and control of access, and to control the security of access. All Access Control Systems have a type of reader, control panel, software, and other peripheral devices.

Access Control Cables consist of:

- Reader Cables: Dependent on the type of reader (barcode, biometric, computer chip etc.)
- Door Contact Cables
- Request to Exit Cables
- Lock Power Cables
- RS-485 Cables: Communication cables for low streaming data to the control panels
- LAN/Networking Cables: Communication for low/medium/high data rates for data transfer

MAX-FOH Flexible & MAX-FOH SHIELD

APPLICATION

PAGA cable is a type of fire-resistant cable used for Public Address and General Alarm (PAGA) systems. MAX-FOH Flexible and MAX-FOH Shield is suitable for public address and general alarm system. PA system will be used as voice alarm system that make announcement during emergency to evacuate the occupants in a building. MAX-FOH Flexible and MAX-FOH Shield is highly flexible due to the unique tubing design.
